# Clear Growth Targets

10 GW by 2030

30-45 GW by 2040

# Great Future for Floating

Ideally positioned for floating offshore wind

Several floating demonstration projects already in operation

**Ideol's floating wind turbine off Japan officially inaugurated after months at sea**

06/06/2019

# Great Opportunities for German Companies in Japan

## Japan has:

Vision for offshore wind

Clear government policy

Strong financial and industrial players

## Japan needs:

Technologies

Experience

Lessons learned

# Takeaways

Long-term roadmap  
(2040 target) in place

Detailed regulatory  
framework in place

Great potential for  
bottom-fixed and  
floating offshore wind
