Offshore Wind Workshop

German-Japanese Energy Partnership

The Ministry of Economy, Trade and Industry (METI) of Japan and the Ministry of Economic Affairs and Energy of Germany have been promoting energy cooperation in the field of renewable energy and energy conservation, including offshore wind, through the Japan-Germany Energy Transition Working Group under the Japan-Germany Energy Partnership. As part of the framework of the Working Group, Adelphi, a German consultancy which supports the Working Group activities, will host a Japan-Germany Offshore Wind Workshop on November 15, 2021.

The workshop will introduce policy trends and support measures in both Japan and Germany, and will also provide an opportunity for business matching to promote industrial cooperation.
